CAPITALFTS / FACILITATED TRADING SIMULATION

Forex Trading Simulator

Explain a currency-market decision.

Use a facilitated currency-market exercise to connect exchange-rate changes, position choices and risk limits.

LEARNING FOCUS

- Currency quotation and exposure
- Trading decisions under volatility
- Position and limit discipline
- Scenario-based debriefs

Where it fits

International finance, treasury, foreign exchange and facilitated markets training.

An example learning activity

For a proposed session, set a currency exposure and an event-driven exchange-rate move. Ask participants to choose a response, record the rationale and explain how it changes the exposure.

What an instructor can review

A position log and debrief that reconciles the quote convention, the exposure and the simulated result.

Confirm release, instruments, format, facilitation and licensing with CapitalWave.
